WORK EXPERIENCE

Elsewhere Communities

Software Engineer | August 2022 to January 2023

- Converted project from Material UI to Tailwind CSS, developed custom, responsive and accessible components while working with team designer and using Figma for mockups and design.
- Launched a complete UI rework of the product and shipped complete game concept from start to finish using React, TypeScript, TypeORM, Node, Express, AWS, PassportJS, React Router.
- Troubleshoot and debugged code to resolve technical issues and improve application performance.
- Utilized Git for version control and continuous integration and deployment processes, including advising on CI/CD process and taking initiative to complete a proof-of-concept for CI/CD with a Vercel & Heroku combo versus Railway.

Co.Lab

Full Stack Developer | May 2021 to July 2021

- Lead developer on [YourRoomz](#) working with a cross-functional team of a Product Manager, designer and another developer to design, spec and create a MVP product.
- Collaborated with the design team to implement responsive designs that improved user experience and with the Product Manager to ensure the correct features were being developed and deployed.

Freelancer – R//Anger Development

Front-end and WordPress Developer | 2016 to 2022

- Manage the design and development of websites for local, small businesses. Including designing landing pages, handling SEO, developing lead generation strategies and implementing site changes.
